# Ancillary Products

**AROMA**  
Coffee Company

## Automatic Boiler

A selection of plumbed in boilers in various capacities to provide a constant supply of boiling water for all your hot beverage requirements.

## WHK Cup Heater

The WHK pre-heats up to 96 cups to provide constant warm crockery to ensure that the perfect cuppa remains at the optimum temperature for your customers enjoyment

## Water Chiller

The Chiller is plumbed in to provide a constant supply of chilled water. All water passes through a carbon / resin filter to improve the taste & removes any odours that may have been present ensuring ongoing refreshing cooled water for any working environment.

## In store 'Coffee to Go' Stations

Aroma Coffee Company branded coffee docks / stations made to measure, available in low profile maple finish or high grade stainless steel styling complete with canopy & lighting to maximise the impact in your store.

## Chilled Milk Dispenser

Stylish chilled dispenser to ensure fresh milk throughout the day.

## Automatic Salt Regenerated Softeners\*

Automatic salt & resin based water softeners dramatically reduce lime scale levels providing protection to all equipment being supplied & reducing service intervals

## Water Filtration Systems\*

The scale guard cartridge removes unpleasant tastes & odours from water & will reduce lime scale levels, reducing services costs in de-scaling equipment

(\* The systems offered above are regarded as "Scale reduction systems", therefore do not offer complete protection to your equipment but should significantly reduce service intervals & requirements. In addition the effectiveness of these systems directly relates to the vigilance of the operator in relation to maintaining the system correctly.)
